G. & R. Summer Grown, Winter Rested, Own Root Roses

Very few persons, even in the trade, realize to what mammoth proportions the own root Rose business has reached in the past few years. Our business has grown by leaps and bounds, and the end is not yet. It's easy to understand why. Because G. & R. own root Roses give satisfaction. They grow and bloom; they work year in and year out; they have permanency. Not so the budded Roses that are like "a flash in the pan" and gone. No wonder when the customers know about budded Roses they absolutely refuse to purchase and no one blames them. Give your customers the best, and the best are G. & R. own root Roses.

The Largest Rose Growers in the World

Although our stock of Roses for 1918 was several hundred thousand more than we ever grew, still we sold out early in the season and were compelled to turn down orders for three-quarters of a million Roses we could not supply.

One of our customers in Oregon says: "Several years ago we bought your Roses, then we made the attempt to grow them ourselves, then again we tried the California-grown Roses, but we are back with you and we are back to stay. No Roses do so well with us as the G. & R. Roses. We expect to plant more largely of your Roses each year." This is why G. & R. Roses are finding a ready market everywhere they are tried.

Rose After-Satisfaction

When you buy G. & R. Roses you get along with them the after-satisfaction—that sense of realizing all the success that should come from planting quality Roses, the knowing that no better results are possible to be obtained outside of G. & R. Roses. It is the after-satisfaction that has compelled us to plan to grow for the coming season one million additional Roses. Think of it, the after-satisfaction of selling six million Roses, and demanding a million increase in one year. Going some! you say. Yes, but are you getting your share of this Rose after-satisfaction? If not, why not? Plant G. & R. quality Roses. None better, none so good.

HYBRID TEA ROSES New Varieties and a Few that are Scarce

This is a class of recent creation, embodying the delicate shades and peculiar fragrance possessed by the Tea Roses combined with the vigor and more pronounced pink and crimson shades of color previously confined to the Hybrid Perpetual class. In our opinion the Hybrid Teas will supersede all others because of their superior constitution and marvelously free-flowering qualities. In a sentence, it may be said they combine all the better traits of the two classes from which they sprang, altogether a great advantage. Almost all are highly perfumed, an attribute absolutely essential to a perfect Rose. They are ever-bloomers and hardy in all but the most rigorous climate.

ADMIRAL WARD (Pernet Ducher, 1915)—Large, full, globular flowers freely and continuously produced. Color crimson-red, shaded fiery-red and velvety crimson. Fine bedding variety.

AUGUSTUS HARTMANN (B. R. Cant & Sons, 1914)—Brilliant geranium-red flushed with orange; flowers of large size and beautifully formed. It obtained three silver medals in 1913 as "the best bloom in the show." Very fine.

AUTUMN TINTS (B. R. Cant & Sons, 1914)—Coppery-red shaded with orange and salmon; flowers produced in great profusion. An exceedingly attractive garden Rose. Similar in color to Mme. Edward Herriot. Very lovely.

CHAMP WEILAND (Weiland, 1916)—This is the new Killarney; said to be a great improvement.

CHEERFUL (McGredy, 1915)—Pure orange-flame, the flame tints overspreading the petals, giving it a wonderful and pleasing effect. Together with the distinct orange-yellow base, creates a combination of color hitherto unknown in Roses.

COLUMBIA (Hill, 1918)—It is a big Rose, the open flower measuring six inches across. The color is a true pink, about the shade of a perfect Shawyer, deepening as it opens to glowing-pink. A peculiarity of the variety is that the shades all become more intense until the full maturity of the open flower is reached and this color is enduring; a great Rose.

COUNTESS CLANWILLIAM (Hugh Dickson, 1914)—Flowers very large and full, produced in endless abundance; buds long and pointed, opening to large, full, high centered flowers of great beauty and refinement. Color delicate peach-pink at the base of the petals, which are flamed and heavily edged with deep cherry-red, a beautiful contrast of color. A charming Rose. Gold medal, N. R. S.

CRIMSON CHATENAY—This is the Crimson Chate-nay, a great Rose. All know the Mme. Abel Chate-nay. Well, this is a crimson form with all the other good qualities of its parent.

CRIMSON QUEEN—Strong, upright grower, flowers large and full. Color a rich bright velvety crimson. A grand garden Rose, as it is always in bloom.

EDGAR M. BURNETT (McGredy, 1914)—Very large, full flowers of fine shape and form, with large flesh petals tinted rose. Undoubtedly the sweet-est-scented Rose in existence, even surpassing La France in this respect; unequaled in its color as a bedding Rose. Gold medal, N. R. S.

ETINCELANTE (Chambard, 1914)—Bright brilliant red, shaded with purple, large, full and of fine form, opening into an enormous bouquet of fragrance; bud elongated, of brilliant velvety crimson color. Free flowering. Extra fine.

FLORENCE FORRESTER (McGredy, 1914)—Clear snow-white with a lemon tinge; as the flowers age they become a pure white, the blooms are even larger than Paul Neyron. Its habit is absolutely perfect, and the freedom with which it flowers is marvelous. We consider this Rose the grandest of all whites for bedding. For size and substance has no equal among Hybrid Teas. Is very sweetly perfumed. Gold medal, National Rose Society.

FRANCIS SCOTT KEY (Cook, 1914)—An American seedling, raised by John Cook. It is a heavy double Rose of great substance. In color, red. It shows good growing characteristics and is undoubtedly a valuable variety. Throughout the summer this Rose was unequaled as a cut Rose and it is proving equally good in midwinter to be an excellent grower, opening perfectly and worthy of unqualified recommendation.

HYBRID TEA ROSES—Continued

G. AMEDEE HAMMOND (Alex. Dickson, 1915)—The color is cadmium or deep apricot egg yolk, shading off to fawn or delicate buff. Blooms large, full, perfectly formed; very floriferous and fragrant. A great acquisition and a Rose we set great store on.

GLADYS HOLLAND (McGredy, 1918)—Of magnificent form and size. Color buff, shaded orange-yellow, outside of petals pearly-peach. Very free flowering. Awarded a gold medal, National Rose Society of England.

GLOIRE DES BELGES (Chambard, 1916)—Growth vigorous and free, flowering continuously until late in the season. Buds oval, long and of elegant form with vivid colors of carmine and cochineal. Fine for massing and a fine cut flower.

GOLDEN SPRAY (Hugh Dickson, 1918)—Unique in habit and growth, it sending up long arching shoots which form great loose elegant sprays, every bud of which opens up in succession. The buds are very long, of deep Marechal Niel yellow, opening to almost single blooms of clear lemon-yellow. Awarded gold medal, National Rose Society of England.

GORGEOUS (Hugh Dickson, 1915)—Flowers large and full, exquisitely formed and produced in endless profusion. Deep orange-yellow and heavily veined with reddish-copper, the most charming and gorgeous coloring which has yet been introduced. The most striking Rose in existence. Gold medal, N. R. S.

HADLEY (Montgomery Co., 1914)—Hadley is a development from a line of seedlings raised by Alex. Montgomery, Jr., the varieties used in this development being Liberty, General McArthur and Richmond. In color it is a deep velvety crimson, retaining its brilliancy at all seasons of the year. The variety is double and buds are well formed. The fragrance is excelled only by American Beauty. It is a strong, rapid grower, and the flowers are borne on long, stiff stems. It has proven itself under thorough trial to be an all-the-year-round forcing variety.

HELEN TAFT (U. S. Botanical Gardens, 1914)—A rich cerise-pink. Flowers very large. A free bloomer and will become as famous as a bedding Rose as is the variety President Taft. Growth very strong. Keep your eye on this variety.

HENRIETTE—One of the finest in existence for bedding, garden and cut-flower purposes; blooms erect on long stems; buds long and pointed. Color fiery orange-crimson, changing to soft coral-salmon. Very hardy. Free in habit.

H. F. EILERS (Lambert, 1914)—Outer petals carmine-rose; center carmine and slate-blue red. Buds very long and pointed; flowers large and full with high center.

HOOSIER BEAUTY (Dorner, 1915)—We use description of E. G. Hill Co.: "If you need a more profitable red Rose than the one you are growing, 'Hoosier Beauty' is your variety. It is as fragrant as Richmond; has more petals, a stiffer stem, a texture like velvet. In color, glowing crimson-scarlet, with darker shadings. The bud is of good length, ships well in the close-cut state, and opens into a magnificent bloom, quite dazzling in velvety brilliance. As soon as thoroughly established in the soil it sends out long, stiff growths with a bud on every shoot. It does not need to be pinched like Killarney or Richmond, but produces, naturally, stems two to three feet in length; each plant keeps up a very close succession of bloom, and again unlike Richmond it is a good summer Rose. It is a clean grower, shows very little inclination to 'spot' or mildew; indeed, the variety is quite clear of both. It is an easy doer, grows side by side with Richmond and Killarney, and has become instantly popular and in heavy demand in the four cities where blooms have been sold, flower buyers through the section calling for it by name. We are describing the Rose very fully in response to questions asked us by intending purchasers." We believe this Rose will make its mark as a garden variety.

IMOGEN (W. Paul & Son, 1915)—Orange-yellow in center, shading towards the edge of petals to pale yellow and creamy-white. A great acquisition to Roses of its color.

KILLARNEY BRILLIANT (Alex. Dickson, 1914)—The introducers are to be congratulated sixteen years after the advent of Killarney in giving us this distinct novelty, which is undoubtedly the best of the Killarney type. Killarney Brilliant has the same habit of growth and the same freedom of bloom as its parent, while the flower is more double. The color is a very brilliant pink and varies like Killarney. In the garden in bright weather is clear pink, and in dull weather almost crimson. Extra.

Lillian Moore.

LADY GREENALL (Alex. Dickson, 1914)—Intense saffron-orange, heavily zoned and overspread on deep creamy-white; reflex of petals faintly suffused delicate shell-pink, large, perfectly finished, very floriferous, strongly tea perfumed. A truly magnificent Rose.

LILLIAN MOORE (Hugh Dickson, 1917)—No Rose ever has been offered to the public with the same credentials, having won in strenuous open competition with Roses from all countries of the world the much-coveted One-Thousand-Dollar-Trophy offered by the "Panama-Pacific Exposition" for the best new seedling Rose not in commerce, and named "Lillian Moore" in honor of the wife of the president of the exposition, Mr. Charles C. Moore. Color deep pure Indian-yellow with slightly deeper center; long buds; free bloomer. A gem.

LOS ANGELES (Howard and Smith, 1917)—Originators' description: "Los Angeles is, by all odds, one of the finest Roses ever introduced. The growth is very vigorous, and produces a continuous succession of long-stemmed flowers of a luminous flame-pink toned with coral and shaded with translucent gold at the base of the petals. In richness of fragrance it equals in intensity the finest Marechal Niel. The buds are long and pointed and expand into a flower of mammoth proportions, while the beauty of form and ever increasing wealth of color is maintained from the incipient bud until the last petal drops."

MADAME BARDOU JOB (Dubriul, 1914)—Chrome-yellow and canary citron-yellow, large, full and cupped form. Very free flowering and very distinct.

MADAME COLLETTE MARTINET (Pernet Ducher, 1916)—A vigorous grower of coppery-orange color. The color is very deep and clear, and holds well, which can be said of few yellow sorts. It is a nice grower, free in bloom, and those wanting a yellow different from "Ward" or "Sunburst" should try this one.

HYBRID TEA ROSES—Concluded

MADAME MARCEL DELANNEY (Leenders, 1916)—A surprisingly beautiful novelty raised by the introducers of the popular Rose Jonkheer J. L. Mook, and honored with the award of the Gold Medal of the Bagatelle Gardens at Paris, 1915. It is distinct and peculiar in color, a pale soft pink or rose shaded with hydrangea-pink. The flowers are very large, full and fragrant, perfect in form, and borne on rigid stems. The growth is vigorous and very floriferous.

MADAME THEODORE DELACOURT (Pernet Ducher, 1914)—Reddish-salmon shaded clear yellow; large flowers of globular form; a rare color.

MARGARET DICKSON HAMILL (Alex. Dickson, 1915)—A magnificent Rose. Its delicate solid maize-straw color with delicate carmine on back of petals makes it an outstanding Rose. Gold medal, N. R. S.

MISS WILMOT (McGredy, 1917)—The most refined and charming Rose ever raised. There is an appealing sweetness about this most distinct variety that will please lovers of Roses all the world over. The color is practically a uniform soft sulphury-cream, with the faintest flush towards the edges. In shape and form this Rose is a model of perfection, every flower comes perfect and produced with a freedom that is marvelous. A wonderful garden Rose. Gold medal, N. R. S.

MOLLY BLIGH (Dickson & Sons, 1918)—This Rose is described by the introducers as a queen among queens. The flowers are large, ideal shape, deep spirally pointed, of a deep maddery-pink heavily zoned orange-madder at the base of the petals, exquisitely fragrant and very free.

MRS. P. L. BAUDET—Color carmine-rose flecked with salmon-yellow, center darker. Flowers large and full, vigorous in growth, continuous in bloom. A unique two-tone Rose.

MRS. A. GLEN KIDSTON (Alex. Dickson, 1916)—Of the lovely type of "Lady Pirrie," and a perfect bedder. Color rosy-carmine, brilliant and attractive. Buds pointed with rich tea fragrance. Habit, branching growth, freely produced.

MRS. BRYCE ALLAN (Alex. Dickson, 1916)—Strong Moss-rose perfume. Color carmine-rose. Flowers globular in form, very erect stems, deep green foliage.

MRS. C. E. SHEA (McGredy, 1916)—Brilliant madder-red, shot with glowing scarlet. The outer petals show a deep rose shading on an orange base; very free, with a distinct perfume.

MRS. CHARLES BELL (Pierson, 1918)—This new Rose will appeal to those who grow Roses out of doors. It may be described as a shell-pink Radiance, and is a sport of that well known Rose. It has no characteristics which make it distinct from Radiance except that it is shell-pink. Mrs. Chas. Bell, Red Radiance and Radiance offer a range of color that will be welcome, and there are no finer garden Roses for America than these three.

MRS. HENRY WINNETT (Dunlap, 1918)—This is a seedling raised by John H. Dunlap, of Canada, and has the distinction of being the first seedling Rose of Canadian origin that has been offered in commerce. In color it is a bright shade of crimson, not so dark as Hadley, and not so light as Richmond. It is a color that pleases the retail storeman and his patrons. The finest of all red or crimson varieties. Buds are long and well formed. A superb red Rose.

MRS. HUGH DICKSON (Hugh Dickson, 1915)—A grand Rose for any purpose. Deep cream with a heavy suffusion of orange and apricot, delightful perfume, one of the most beautiful and useful Roses. S. G. medal, N. R. S.

MRS. MACKELLAR (Alex. Dickson, 1915)—The glorious blooms make this an imposing Rose. A deep citron or delicate pure canary color. As the large blooms gracefully expand the guard petals charmingly reflex and become pearly primrose-white of great decorative beauty. Award of merit (unanimous), R. H. S., London.

MRS. SARAH YEATS (1917)—The color is a new and brilliant red. The petals are very large for a Rose and of splendid texture. Mrs. Sarah Yeats is not an experimental Rose, but one that has been successfully produced under ordinary greenhouse conditions. Stems run eighteen to forty-two inches long without pinching. It holds up longer after being cut than any of the red Roses.

NATIONAL EMBLEM (McGredy, 1915)—Dark crimson of perfect shape, habit and inflorescence; as a bedding, massing and cutting Rose it is unique. Buds long and pointed, opening to large, full, handsome flowers of great beauty, flowering freely and continuously.

RED LETTER DAY (Alex. Dickson, 1914)—An exceedingly beautiful Rose of infinite grace and charm. Its velvety, brilliant, glowing scarlet-crimson buds and fully opened cactus-like flowers never fade, as the reflex of the petals is satiny crimson-scarlet. Awarded S. G. medal, N. R. S.

RED RADIANCE (Gude, 1916)—The Washington Red Radiance. A glowing crimson sport of Radiance with all the magnificent qualities of the parent; the enormous globular flowers on heavy canes are a sight to be long remembered. This variety will be in very heavy demand as soon as it is known. The color is dazzling crimson-scarlet. An improvement on the other Radiance sports that have appeared.

ROSE MARIE (Dorner, 1918)—This is a grand Rose of the very highest merit. A rich red that has come to stay. Might best be described as a bright watermelon-red. Very desirable.

ROSITA MAURI (Ketten, 1914)—Pure deep rose-pink, large, full, sweetly scented. Elongated bud. Extra.

SALLIE (B. R. Cant & Sons, 1915)—The flowers are large and full, outer petals creamy-flesh, gradually deepening towards the center of the bloom, with splashes of rich yolk or egg color. Awarded first prize at the International Show, Chelsea.

TIPPERARY (McGredy, 1917)—In color stands between Lady Hillingdon and Melody, showing an attractive shade of soft golden-yellow in the bud and half developed flower. Its freedom of flowering and its habit of growth will make it one of the most desirable Roses of its color.

TOTALE GELOS (Pernet Ducher, 1915)—A very vigorous grower of erect branching habit. Long bud borne on stout stem; large, full, globular flower, flesh-white color shaded with chrome-yellow in the center at the autumn blooming.

W. C. GAUNT (Alex. Dickson, 1916)—Of medium size, with pointed buds, with naturally reflexed guard petals of brilliant velvety vermilion, tipped scarlet. Stems rigid, habit branching, large oval beech-green foliage. Rich tea fragrance; very rich in color.

Standard Varieties, including the Hybrid Polyanthas. They are Hardy.

A class of miniature Roses derived from the Climbing Polyantha. They are of dwarf habit and bloom so freely as to cover the entire plant with bloom all through the summer and fall. The plants are splendid for bedding, or as edgings for borders they are hardy. Let us tell you something about these miniature Roses. While Europe has appreciated these Roses for years, America is just beginning to wake up to the fact that they have come to stay, and anyone who attempts to handle Roses without including this class will bump into something real hard. They are useful, either pot grown or for bedding purposes or for hedge effects. Completely hide the plant with bloom from early till late.

ANNA MULLER (Schmidt, 1907)—This Rose is very much the same as the Crimson Baby Rambler, except in the colors of its flowers, which are a shiny, brilliant pink.

BABY RAMBLER, or MADAME N. LEVAVASSEUR (Lavavasseur, 1903)—This is the original Baby Rambler, daddy of them all. It is in bloom all the time, flowers in large clusters of brightest crimson.

BABY TAUSENDSCHOEN (Welter, 1911)—Its flowers are large and so much like "Tausendschoen." It is a bush form of the "Climbing Tausendschoen" or "Thousand Beauties," having all the charms in the variable coloring in its flowers that its parent has.

CATHERINE ZEIMET, or WHITE BABY RAMBLER (Lambert, 1901)—Grows to a height of twenty inches and produces double pure white flowers in abundance.

POLYANTHA OR BABY RAMBLER ROSES—Concluded

CLOTHILDE SOUPERT (Soupert & Notting, 1890)—(H. Poly.) Known the world over as one of the very best of all bedding Roses. The only rival of "Hermosa" as a bedder and market pot plant. The color effect is beautiful ivory-white, shading towards the center to bright silvery-pink. Everybody's Rose.

ELLEN POULSON (Poulson, 1912)—Dark brilliant pink, large, full, sweetly scented. Most floriferous.

ERNA TESCHENDORFF (Teschendorff, 1911)—The flowers are of a deep crimson color, flushed with carmine, resembling the dazzling color of "Gruss an Teplitz." It is much sought after in America to bloom in pots during winter and for Easter time.

JESSIE (Merryweather, 1909)—The flowers, which are produced in huge clusters, are of a bright cherry-crimson color which does not fade.

LE PONCEAU (Hemeray-Aubert, 1910)—Dark red, blooms in large clusters. A choice variety.

MARIE PAVIE (Alegatiere, 1888)—Borne in large clusters; color white, flushed with carmine; delightfully perfumed.

MADemoiselle CECILE BRUNNER (Ducher, 1880)—(H. Poly.) This is the popular Baby Pink or "Sweetheart" Rose. In the past year or two this Rose has fairly jumped into popularity. It has become quite the rage. It makes a handsome miniature Rose,

coming in sprays of three to five buds. Color blush, shaded light salmon-pink; distinct and desirable.

MOSELLA (Lambert, 1895)—(H.P.) Center of flowers chrome-yellow; edges of petals shading out to creamy-white.

MRS. WILLIAM H. CUTBUSH (Levavasseur, 1907)—It produces in constant profusion throughout the entire summer its pleasing delicate pink blooms in large trusses.

ORLEANS (Levavasseur, 1910)—Showiest and prettiest of all Baby Ramblers. This charming and dainty Rose is of beautiful rounded habit and is a huge bouquet of deep cerise or Geranium-pink with distinct showy center of pure white; florets not crowded, but of beautiful arrangement, and cannot be beaten. The color is irresistible. Plant grows like a weed and flowers are nearly "immortelle" in their lasting qualities. We believe that they will outlast almost any Rose in existence with their stiff paper-like texture. This pretty Rose has taken Europe by storm and has made a sensation. Awarded gold medal.

PERLE D'OR (Dubreuil, 1883)—Nankeen-yellow with orange center; novel and beautiful. This Rose is dividing honors with "Mlle. Cecile Brunner" as a cut flower, being planted largely for this purpose.

POLYANTHA OR BABY RAMBLER ROSES, Newer Varieties

BABY DOROTHY—This is a glorious Rose. Flowers resemble the Dorothy Perkins. Completely hides the plant with its bloom.

BABY FARBENKONIGIN—This is a new baby Rose bearing flowers that in color are same as Farbenkonigin or Queen of Colors. Rosy-red, Extra.

CLARA STAHL—A fine pink Polyantha that is a winner. You know there is not an oversupply of good pink Polyanthas. Well, here is one that will surprise you. Try it. Bright pink.

EDITH CAVELL—Bright crimson; white eye; very beautiful.

ETOILE LUISANTE OR BABY HERRIOT—Just picture to yourself the Fairy or Sweetheart Rose ("Cecile Brunner"), colored up like the Daily Mail Rose ("Mme. Edouard Herriot"), only brighter and more brilliant than when that variety is at its best, and you will have some conception of the beauty of this little gem which on account of the similarity in color has been known among the cut flower trade as Baby Herriot. Its color is a shrimp-pink with intense coppery-scarlet suffusion, the base of the petals golden-yellow which intensifies and lightens up its high colors. Plant is of free growth and floriferous. We are certain that Baby Herriot will please everyone.

GEORGE ELGER (Turbat & Co., 1913)—A lovely little golden-yellow Polyantha Rose, with a good admixture of Tea blood; like all of its class; it is free in growth, free in bloom, with small, glossy foliage produced in profusion. The dainty little pointed

yellow buds open into pretty little symmetrical Roses. Will prove a very popular corsage variety; is grown in quantity now for this purpose.

GRUS AN AACHEN (Geduldig, 1909) (H. Poly.)—Yellowish-rose colored with salmon-pink and red shadings; full, strong, free blooming and disease proof; erect and of moderate growth. Owing to the size and beauty of its flowers and its symmetrical growth, this variety is highly recommended for low, bright massing.

LE MARNE—Dwarf, perpetual flowering Polyantha. Semi-double flowers, bright salmon-rose at the edges, rosy-blush inside. Blooms abundantly and continuously in bouquets of fifteen to forty flowers. Has fine keeping qualities.

Mlle. FRANCISQUE FAVRE—Dwarf Polyantha. Robust in growth, quite continuous in bloom, flowering in large trusses of single flowers. Color, velvety crimson, with large silver-white eye. Extremely showy.

PINK TAUSENSDSCHOEN (Rosarie)—This is a bright pink form of Tausendschoen. A grand Rose from any standpoint.

TIP TOP, "Baby Doll" (Lambert, 1915)—This delightful little "Sweetheart" Rose is a wonder. The color is absolutely new, and quite startling in its brilliancy, golden-yellow tipped with clear, bright cerise. The foliage is narrow, long and sharply pointed, a deep glossy green—a very beautiful setting for the lovely little doll-roses, a bench of "Baby Doll" being an even parterre of delicious color.

HYBRID PERPETUAL ROSES, Newer Varieties

The first Hybrid Perpetuals were grown from crosses between Hybrid China and Tea Scented Roses with Gallica and Bourbon Roses. This is a beautiful class and cannot be too highly recommended, including, as it does, many of the hardiest early and late flowering kinds and nearly all of the superb rich crimson, red and pink varieties which make such pleasing contrasts to the yellow and white Teas. These are hardy.

DUCHESS OF SUTHERLAND (Alex. Dickson, 1912)—Color, delicate rose-pink with lemon shading on the white base, charming.

GEORGE AHRENDSEN—See Pink American Beauty.

GEORGE DICKSON (Alex. Dickson, 1912)—As near as we can describe it, the color is a velvety black-crimson, the back of the petal being heavily veined with deep pure crimson-maroon. We have regularly had blooms of the highest exhibition standard quite five inches across. It has wonderful lasting qualities, not only as to the retention of its color, but also in its shape and freshness. Awarded the gold medal of the National Rose Society of England, besides many other first awards at various other shows in England and Ireland.

HEINRICH MUNCH (Hinner, 1912)—Soft pink, very large and full; vigorous, fine for forcing in pots and for garden culture. Took the sweepstakes prize at the Boskoop Rose exhibition in June, 1913. This is without doubt the finest of all Hardy Pink Roses. It is a true Pink Druschki. Don't fail to try this Rose.

KING GEORGE V (Hugh Dickson, 1912)—The color is quite unique amongst Hybrid Teas, being rich blackish-crimson, with deep velvety violet flush, a striking and brilliant color, not burning in the

sun nor turning blue, as so many of our very dark Roses do. It is very free flowering and perpetual, and delights in a warm sun. The perfume is strong and very pleasing. Awarded the gold medal of the Festival of Empire, Crystal Palace, London, June 29, 1911. With us this Rose is a pure Hybrid Perpetual.

YELLOW AMERICAN BEAUTY, or LEMON QUEEN

—A yellow form of American Beauty. This is as wonderful in its way as White American Beauty.

PINK AMERICAN BEAUTY, or GEORGE AHRENDSEN (Hinner, 1910)—This is the wonderful "Pink American Beauty." This Rose we predict will have as large a following and be as largely planted in a very few years as the now famous "White American Beauty."

We have looked it over in the field and grown it in pots for the market, and we absolutely cannot detect a single fault in it or about it. The growth and make-up of the plants is superb, while the delicate pink color is unapproachable. Thank you, Mr. Hinner. You have enriched our Rose collection for all time. You know what some of you have missed by delaying so long in getting acquainted with "White American Beauty." Do not repeat this mistake with "George Ahrendsen."

CLIO (W. Paul, 1894)—Flesh color, shaded in the center to rosy-peach. Large, fine, globular form; free bloomer.

CONRAD FERDINAND MEYER (Froebel, 1900)—This Rose has Rugosa blood in its make-up and is classed by some as a Hybrid Rugosa. Flowers large, perfectly double, cup-shaped. Color deep, bright, vivid, intense pink, with the penetrating fragrance of the old June Roses. We have grown this Rose for years, in sections of the country from Canada to the Gulf, and we have no hesitancy in saying after the most thorough and rigid test that a Rose can be put to that this Rose is in every respect just what we claim for it.

GLOIRE LYONNAISE (Guillot, 1885)—Very large, full flowers. Color white, base of petals canary; Tea Rose perfume.

HUGH DICKSON (Hugh Dickson, 1904)—Color brilliant crimson shaded scarlet; large and fine form, opening well in all weathers. Very sweetly scented.

J. B. CLARK (Hugh Dickson, 1905)—The color unique among Roses, being deep scarlet shade blackish-crimson, with rich bloom like a plum; flowers are large and beautifully formed. Awarded the gold medal, N. R. S.

JOHN HOPPER (Ward, 1862)—Bright rose, reverse of petals pale lilac; large, double; free bloomer.

JUBILEE (Henderson, 1898)—A pure crimson, with shadings of maroon; a grand Rose from every point of view.

MRS. JOHN LAING (Bennett, 1887)—Color clear, bright, shining pink; exquisitely shaded. Awarded gold medal, N. R. S.

MRS. R. G. SHARMAN CRAWFORD (Alex. Dickson, 1894)—Clear rosy-pink; the outer petals shaded with pale flesh; one of the very finest Roses. Gold medal, N. R. S.

NOVA ZEMBLA (Mees, 1907)—A sport from Conrad F. Meyer, inheriting all the good qualities of its parent with the added merit that the flowers are pure white, full and sweet-scented.

PAUL NEYRON (Levet, 1869)—Deep rose; flowers of immense size; indeed many claim this to be the largest Rose grown.

PRINCE CAMILLE DE ROHAN (E. Verdier, 1861)—Deep velvety crimson-maroon, full and of good form and perhaps the best of all the hardy dark Roses.

ULRICH BRUNNER (Levet, 1881)—Cherry-red, of immense size; fine form and most effective in the garden.

VICK'S CAPRICE (Vick, 1893)—Large, full. Color bright satiny-pink, striped with white and carmine.

WHITE AMERICAN BEAUTY (Lambert, 1900)—We drop the German name Frau Karl Druschki and use this instead. This grand white Rose has become renowned as the very highest type of its class and the best snow-white Rose ever introduced. It is an extraordinarily strong grower, and has the vigor and hardiness of an oak. Its magnificent flowers are nothing less than glorious—immense in size and produced with great freedom. The color is a marvelous white, without a tinge of yellow or any other shade. A true paper-white, the standard by which all white Roses are judged. We grow "White American Beauty" literally by hundreds of thousands.

HARDY CLIMBING ROSES, Newer Varieties

and a few that are scarce including the Ramblers, Cl. Polyanthas, Wichuraiana, Multifloras, Hybrid Noisettes, Setigera and Climbing Chinas.

These Roses are suitable for planting where they can climb on walls, fences, galleries, porches, pillars, pergolas, arches, etc.; in fact, wherever a hardy climber is required. This list includes the Ramblers, Climbing Polyanthas, Wichuraianas, etc.

AMERICAN PILLAR (Conard, 1909) — (C. P.) A single flowering variety of great beauty, which appeals to everyone. The flowers are of enormous size, three to four inches across, of a lovely shade of apple-blossom pink, with a clear white eye and clusters of yellow stamens. These flowers are borne in immense bunches, and a large plant in full bloom is a sight not easily forgotten. They last in perfection a long time, and are followed by brilliant red hips or berries, which are carried late into the winter; and as the plant frequently retains its lovely green foliage until the end of November, it forms a beautiful decorative subject throughout the autumn. A great Rose to grow in pots for Easter.

CLIMBING AMERICAN BEAUTY (Hoopes Brothers & Thomas, 1911) — (H. N.) A seedling from American Beauty with Wichuraiana and Tea blood in its veins. The introducers say of it: "Same color, size and fragrance as American Beauty, with the addition of the climbing habit. Good foliage and better blooming qualities. One plant of this new Rose will produce twenty times as many flowers in June as the old American Beauty, besides blooming occasionally during the summer. Blooms three to four inches across; has proved perfectly hardy and stands heat and drought as well as any Rose in our collection." This Rose has already made its mark, and wherever it has been planted it has pleased, until today we sell it by the tens of thousands. You lose if you are slow to take hold of the "Climbing American Beauty." It grows and blooms.

CHRISTINE WRIGHT (Hoopes Bros. & Thomas, 1913) — (W.) A most exquisite new Rose, a cross between Caroline Testout and an unnamed seedling; it is of strong climbing habit, with large, heavy, dark green foliage, which is immune to disease. The flowers are double, from three and one-half to four inches in diameter, borne singly and in clusters, of perfect form, beautiful in the bud and in the fully expanded flower; in color a most refreshing bright wild-rose pink; it flowers profusely during June, and continues more or less throughout the season.

GEISHA (Geschwind, 1914) — (C. H. P.) Brilliant scarlet-crimson. The long shoots are completely covered with bloom the entire length. A wonderfully pretty Rose.

GOLDFINCH — This is the yellow-flowering "Tausendschoen." All know the good qualities of that superb variety. Well, this is a yellow form, and is attracting much attention and many favorable comments.

LE MEXIQUE (Schwartz, 1913) — (W.) Delicate silvery-rose, turning to rosy-white, reverse of petals light rose. Large for its class. Flowers full, opening well, produced in clusters. Continuous and perpetual flowering.

LE POILEAU (New Hybrid Climbing Moss) — Very fine, vigorous bush, with long heavy branches bearing large, thick foliage of Moss Rose type. The flowers are produced in bouquets of eight to fifteen; large, double and well formed. Color, satin-rose, shading to heliotrope, and nicely mossed. Strong climber.

PAUL'S SCARLET RUNNER (W. Paul & Son, 1917) — (W.) Vivid scarlet, shaded crimson, makes a brilliant display for a long period of time in the garden. A wonderful new climbing Rose. Received the gold medal and cup for the best new climber at the National Rose Society's exhibit.

SHOWER OF GOLD (Paul & Son, 1910) — (W.) The color is a deep golden-yellow, with orange shadings in the center. This fills the "long felt want" for a "Yellow Rambler."

SILVER MOON (Henderson, 1910) — (W.) Flowers very large, four and one-half inches and over in diameter. Pure white in color; petals of great substance, beautifully cupped, forming a clematis-like flower. The large bunch of yellow stamens in the center adds to its attractiveness.

SOURCE DE OR (Turbat & Co., 1913) — (W.) Color golden-yellow. A great acquisition, producing large panicles of flowers. A decided beauty.

SWEET LAVENDER (Paul & Son, 1912) — (Mtf.) Bright pale mauve or lavender, with golden stamens. Most distinct. Large bunches of flowers.

WICHMOSS, or "BABY MOSS" (Barbier, 1912) — (C. M.) This is a wonderful break in Roses, being a cross between the "Wichuraiana" and "Moss Rose." It has retained the scant habit of the "Wichuraiana," making long growths five to eight feet in length with the glazed resistant foliage, while the bud is heavily mossed in bright green and has the peculiar aromatic odor of the moss family. The flowers are borne in clusters that are a daybreak-pink in color, opening into bloom that is a good semi-double in fullness. A climbing moss is a wonder; hardy.

HARDY CLIMBING ROSES, Standard Varieties

AVIATEUR BLERIOT (Fauque, 1910) — Saffron-yellow, center golden-yellow; full and double, flowering in clusters.

BALTIMORE BELLE (Feast, 1843) — (S.) Blush-white; in large clusters. A splendid hardy climber. An old favorite.

CLIMBING BABY RAMBLER, or MISS G. MESSMAN (Messman, 1911) — (C. P.) Everyone knows how Baby Rambler is always in bloom. This is simply a climbing form of Baby Rambler, embracing all its good qualities.

CRIMSON RAMBLER (Turner, 1893) — (C. P.) Bright crimson flowers produced in large clusters of pyramidal form; grand variety for pillars and arches and to train over porches; also makes a fine attractive hedge. Awarded gold medal, N. R. S. A Rose for the masses.

DOROTHY PERKINS (Perkins, 1902) — (W.) A most beautiful deep pink; the flowers are borne in large clusters of small double blooms and are very sweetly scented; quite first-class. Another Rose for the masses.

DR. W. VAN FLEET (Henderson, 1910) — (W.) Flowers when open run four inches and over in diameter. The center is built high, petals beautifully undulated and cupped. The color is a remarkable delicate shade of flesh-pink on the outer surface, deepening to rosy-flesh in the center.

EXCELSA — See Red Dorothy Perkins.

EMPERESS OF CHINA (Jackson, 1896) — (C. C.) Bright pink; in large clusters.

FLOWER OF FAIRFIELD (Ludorf, 1908) — (C. P.) A counterpart of Crimson Rambler in every respect, except that it shows ever-blooming tendencies, many new growths being terminated with a large cluster of flowers.

FORTUNE'S DOUBLE YELLOW, or BEAUTY OF GLAZENWOOD (Fortune, 1845) — (H. N.) Yellow, flaked with carmine. This is a great Rose in California, where it is seen at its best, although suited for general planting.

GARDENIA (Soupart & Notting, 1900) — (W.) Bright yellow, cream color when open; very fragrant and free; early flowering. This is the hardy Marechal Niel; double yellow flowering.

HIAWATHA (Walsh, 1905) — (W.) Its flowers are about one and one-half inches across, and produced in long, pendulous sprays, with frequently from forty to fifty flowers on a spray. In color it is brilliant, ruby-carmine, with a clear white eye and a mass of golden stamens.

LADY GAY (Walsh, 1903) — (W.) Flowers of a deep cherry-pink, shading on the edge of the petals to a very delicate soft tone of pink.

MADAME ALFRED CARRIERE (Schwartz, 1879) — (H. N.) Pure white, suffused with yellow at base of petals; very free and very fragrant; fine for arches and pillars. In Oregon it grows to the roofs of two-story houses, covering the entire side or end of a large sized house, and simply a wilderness of blooms.

MARY WASHINGTON (Origin unknown) — (Mtf.) Pure white, perfectly double, in immense clusters; fine.

HARDY CLIMBING ROSES, Standard Varieties—Concluded

PAUL'S CARMINE PILLAR—Very early. The flowers are large and very showy, of a rich rosy-carmine with white eye.

PHILADELPHIA RAMBLER (Conard, 1902)—(C. P.) Glowing crimson; large clusters; fine.

PRAIRIE QUEEN (Feast, 1843)—(S.) The old standby red climber. It is so hardy that it delights in the climate of Alaska and Canada.

RED DOROTHY PERKINS, or EXCELSIA (Walsh, 1909)—(W.) It is a good deal to claim for a Rose, but we are within bounds when we describe Excelsia as a brilliant Crimson Rambler flower on glossy, varnished Wichuraiana foliage. The defects of Crimson Rambler are its unsightly foliage in unseasonable weather, and its detonation by insects; the infusion of Wichuraiana blood assures an ornamental climber which is nearly evergreen, and this will assure this lovely crimson-scarlet pillar Rose a place in every American garden, for it is quite hardy in addition to all its other fine points. The flowers are very double, produced in large trusses of thirty to forty, and almost every eye on a shoot produces clusters of flowers. The color is intense crimson-maroon, the tips of the petals tinged with scarlet. The finest of all Crimson Ramblers.

RUSSELL'S COTTAGE (Origin unknown)—(Mtf.) Dark red; double and full; very hardy.

SEVEN SISTERS (Origin unknown)—(Mtf.) Crimson to white and all intermediate shades; extra. An old favorite.

TAUSENDSCHOEN, or THOUSAND BEAUTIES (Schwartz, 1906)—(C. P.) The flowers upon first opening are the most delicate shade of pink ever seen in a Rose, might be described as a white, delicately flushed pink, changing to rosy-carmine. It gets its name from its many flowers and the variation in coloring; will become as famous as Crimson Rambler or Dorothy Perkins.

TENNESSEE BELLE (Origin unknown)—(Mtf.) Beautiful pink; free bloomer; an old standby.

TRIET (Lambert, 1904)—(C. P.) Large clusters of creamy-white blooms, with dark yellow anthers, flowering freely.

VEILCHENBLAU, THE BLUE ROSE (Schmidt, 1909) (C. P.) This is a much better Rose than some give it credit for. It opens a reddish-violet, quickly changing to violet-blue.

WHITE DOROTHY PERKINS (B. R. Cant, 1908)—(W.) It has been the cry of nurserymen for years for a white climber that would rank up with Crimson Rambler, and now we have the pleasure of offering this White Dorothy Perkins, that in every way is the equal, if not superior, to Crimson Rambler as a red, and Dorothy Perkins as a Pink. This Rose has no rival as a white climber.

YELLOW RAMBLER, or AGLAIA (Lambert, 1896)—(C. P.) Bright yellow changing to canary-yellow; produced in pyramidal clusters of fifty or more blooms.

MOSS ROSES

These are probably a sport of the Cabbage Rose. The origin of the double Moss Rose is left to conjecture. They have always been favorites, for what can be more elegant than the bud of the Moss Rose and more delicious than its fragrance. Perfectly hardy.

ELIZABETH ROWE (Rowe, 1866)—This is an old favorite with its large deep pink buds well mossed. A beauty.

HENRI MARTIN (Portner, 1863)—Large, full flower of deep red; well mossed; fragrant.

MOUSSELINE (Robert and Moreau, 1881)—Pure white flower, buds heavily and beautifully mossed.

PRINCESS ADELAIDE (Laffay, 1845).—Deep bluish-pink with buds that are thoroughly mossed.

MISCELLANEOUS ROSES

Under this heading are listed all the Roses not embraced in the different families or types that we name in the preceding pages.

AMOENA, The Pink Flowering Cherokee Rose (Hockbridge, 1909)—(L.) The flowers are the same as the White Flowering Cherokee, except that the color is a glowing pink with a golden-yellow center. Resembles huge apple blossoms.

ARTHUR R. GOODWIN (Pernet Ducher, 1909)—(A. B.) This is a genuine "Pernetiana," and is perfectly hardy everywhere. The color is coppery orange-red, passing to salmon-pink as the flowers expand. A superb combination of color.

DOUBLE LAEVIGATA, or the Double Flowering Cherokee (California, 1900)—(L.) A beautiful hardy Rose, bearing double white flowers; very fine. Foliage is very distinct.

LAEVIGATA, the Single White Cherokee Rose (Lindley, 1820)—(L.) This is the famous Cherokee Rose so well known in California. Large, pure white flowers with center filled with golden-yellow anthers.

MADAME EDWARD HERRIOTT (Pernet Ducher) (A. B.) "The Daily Mail Rose." Winner of the gold cup which was offered by the London Daily Mail, for the best new Rose, exhibited at the International Horticultural Exhibition, held in London, England, May, 1912, and to be known as the Daily Mail Rose. In competition with the world's greatest rosarians this much coveted prize was awarded to M. Pernet Ducher for this wonderful novelty. It was again exhibited in London on May 1, 1913, at the exhibition of the National Rose Society of England, where it was awarded the Society's gold medal. M. Pernet Ducher describes its color as follows: "Buds coral-red, shaded with yellow at the base, the open flowers of medium size, semi-double, are of a superb coral-red, shaded with yellow and bright rosy-scarlet, passing to shrimp-red." A wonderful Rose. The bud is long, slender and pointed, the color is like sunshine on a copper-red metal.

MADAME GEORGES BRUANT (Bruant, 1888)—(R.) Paper white, larger, very free and distinct, flowering in clusters; most beautiful.

MURIEL DICKSON (Austrian Briar)—Color deep reddish copper, opening cherry-red with coppery

shadings. Distinct and very valuable. Buds long, elegant and pointed, freely produced throughout the entire summer. A grand bedding variety.

NEW CENTURY (Conard, 1891)—(R.) A grand Rose that is entirely hardy, bearing beautiful silvery-pink flowers in clusters. This Rose is in bloom all the time.

SIR THOMAS LIPTON (Conard, 1905)—(R.) The best pure white Rugosa Rose. Strong and vigorous; grows four feet high. Flowers perfectly double, pure snow-white. Fragrant.

VISCOUNT ENFIELD (Pernet Ducher, 1910)—(A. B.) Coppery old-rose, shaded with yellow. The inner petals are deeply tinted with carmine, while the center ones are sometimes striped with yellow.

WHITE BANKSIA, or Lady Banks (Keer, 1807)—(L. B.) A vigorous grower, in California growing to the top of tall trees and completely enveloping the entire tree; small double, pure white flowers in clusters, with true violet fragrance. Indeed, if one were blindfolded, he could not detect the odor from Violets. Very desirable.

WICHURAIANA, or MEMORIAL ROSE (Dr. Wichura, of Japan, 1886)—(W.) It is difficult to conceive anything more appropriate, beautiful and enduring for covering graves and plots in cemeteries than the Hardy Memorial Rose. It creeps along the ground as closely as an Ivy. The flowers are produced in lavish profusion in July. They are single, pure white, with a golden-yellow disc, five to six inches in circumference. It is also immensely valuable as a Climbing Rose, covering arches, fences, etc.

WILLOWMERE (Pernet Ducher, 1913)—(A. B.) Color rich shrimp-pink, shaded yellow in the center, and toning to carmine-pink towards the edges of the petals. Vigorous growth, and erect, branching habit. Long carmine coral bud on long, stout flower stalks.

YELLOW BANKSIA, or LADY BANKS (Dampier, 1827)—(L. B.) Same as White Banksia, except color of bloom is sulphur-yellow. Has the same delicious Violet fragrance.

TENDER BULBS

New Godfrey Calla Lily, "Devoniensis"

Undoubtedly the finest thing ever sent out in the Calla line, and quite indispensable. Blooms all winter. Compared with the ordinary Calla, it gives three blooms to one; is snow-white and perfect in form. Blooms on very small plants, though it attains to a very large size with very large flowers. The new Godfrey Calla Devoniensis is a wonder. Two and one-quarter inch pots, \$1.50 per dozen; \$10.00 per hundred. Three-inch pots, \$2.50 per dozen; \$20.00 per hundred.

Calla Ethiopica

All blooming bulbs. Strong bulbs, \$1.25 per dozen; \$8.00 per hundred. Larger bulbs, \$1.50 per dozen; \$10.00 per hundred.

The White Japanese Spider Lily

The florets are disposed in rays and resemble an immense spider of large size; pure white and deliciously fragrant. This is a most desirable flower. \$2.50 per dozen; \$20.00 per hundred.

Milk and Wine Lily

Or *Crinum Fimbriatum*.

A grand sort. The most beautiful of the Crinums. Its bulbs grow large, and its strong growing foliage is erect and sword-shaped. Flowers in umbels, very large and showy, three to four inches in diameter, striped with white and carmine, and very fragrant. Hardy in the South. Price, fine blooming bulbs, \$1.50 per dozen; \$10.00 per hundred.

Amaryllis

Good and Reese American Hybrids. Grown from seed produced by crossing the finest named varieties obtained from the most noted specialists, and we believe the resulting strain here offered to be superior in size, vigor and coloring to anything yet offered. Strong bulbs, 50 cents each; \$4.50 per dozen; \$35.00 per 100.

Grandest of All Gladioli

Good & Reese's International Mixture.

Hundred, \$1.00; thousand, \$7.00; in 10,000 lots, \$60.

BEAUTIFUL FERNS

Successful Fern growing always hinges on whether your Ferns are clean from the white fly. Our Ferns are absolutely clean. The other fellow's are sometimes not, which we know to our sorrow. Better get Good & Reese clean Ferns—always good, always grow.

The Grand New Dwarf Fern, "Teddy Junior" The Fern for Every Household.

This is known to the trade as the greatest of all Nephrolepis. No Fern can equal it. See what a fine plant it makes. Two and one-quarter inch pots, 75c per dozen; \$5.50 per hundred; \$50.00 per thousand. Four-inch pots, \$2.50 per dozen; \$20.00 per hundred.

"Teddy Junior,"
the Wonderful New Fern.

Nephrolepis John Wanamaker

"The Wanamaker Boston Fern."

A "sport" from Nephrolepis Scholzei, with longer, narrower, gracefully drooping fronds. It is not so compact in growth as Scholzei, and, therefore, does not decay in the center, and is a durable house Fern. It is a rapid grower, making an abundance of fronds, and is quite distinct from any other Nephrolepis. Two and one-quarter inch pots, 75c per dozen; \$5.50 per hundred; \$50.00 per thousand.

Nephrolepis Splendida

The Big Four Fern.

This is the most wonderful Fern of them all; it originated with G. & R., and is now offered for the first time. It combines the good qualities of the four most popular sorts. It has the grace of a "Boston," the wavy effect of a "Roosevelt," the fluffy effect of an "Ostrich Plume," and the uniqueness of the "Fish Tail." Two and one-quarter inch pots, 75c per dozen; \$5.50 per hundred; \$50.00 per thousand.

"Big Four Fern."

Nephrolepis Piersonii

The Gold Medal Fern.

(See illustration page 20.)

This is a strain that we have, by selection, improved so it runs back but very little. Two and one-quarter inch pots, 75c per dozen; \$5.50 per hundred; \$50.00 per thousand.

John Wanamaker Fern.

Fronds of the "Roosevelt Fern."

Nephrolepis "Roosevelt"

The pinnae are beautifully undulated, giving the Roosevelt a pronounced wavy effect seen in no other Fern; as the plant ages this effect becomes quite distinct. Our sales of Roosevelt have exceeded two hundred and fifty thousand plants, a far greater number than was ever sold of a new Fern. Two and one-quarter inch pots, 75c per dozen; \$5.50 per hundred; \$50.00 per thousand. Four-inch pots, \$2.50 per dozen; \$20.00 per hundred.

Nephrolepis Elegantissima

The Philadelphia Lace Fern.

This is a greatly improved Elegantissima, not running back nearly so much as the old form. Dozen, 75 cents; hundred, \$5.50; thousand, \$50.00.

Roosevelt Fern.

BEAUTIFUL FERNS—Continued

Goodii, or "Baby's Breath Fern."

Nephrolepis Goodii

The Baby's Breath Fern.

This has the finest foliage of all the Ferns. It is so delicate that a lady on seeing it exclaimed, "Call it the Baby's Breath Fern, as it is so dainty in texture that a baby's breath would set its fluffy foliage in motion." The fronds are very fine and filmy, on which account it has been called by some the Lace Fern. Nothing is daintier or more exquisite than well-grown specimens of any size. Our reputation for it that no Fern in existence can compare with Baby's Breath in fluffiness. Two and one-quarter inch pots, \$1.00 per dozen; \$6.00 per hundred; \$55.00 per thousand.

Nephrolepis Whitmanii

The Ostrich Plume Fern.

This is the well known fluffy leaved Fern; beautiful. Two and one-quarter inch pots, 60c per dozen; \$5.50 per hundred; \$50.00 per thousand. Four-inch pots, \$2.50 per dozen; \$20.00 per hundred.

Ostrich Plume Fern.

Nephrolepis Bostoniensis

The Boston Fern.

A variety that needs no description. By many called the Fountain Fern on account when grown into large plants it droops gracefully. Two and one-quarter inch pots, 75c per dozen; \$5.50 per hundred; \$50.00 per thousand. Four-inch pots, \$2.50 per dozen; \$20.00 per hundred.

Nephrolepis Exaltata

The Old Original Sword Fern

This is the "old original Sword Fern," the "daddy" of them all, the one plant from which all the Nephrolepis we offer sprung. It is entirely different from any of its progeny, having narrow fronds that are long and of very erect growth. For this reason it is more largely used as a centerpiece in vases than are any of its descendants. Two and one-quarter inch pots, 60 cents per dozen; \$5.00 per hundred; \$45.00 per thousand.

Boston Fern.

BEAUTIFUL FERNS—Concluded**Nephrolepis Scotti****The Newport Fern.**

It is a rapid grower, and to see it in all stages of growth from a runner in the bench to a fourteen-inch pot specimen will convince you that it will be in great demand as a house Fern. This has always been a favorite variety. **2¼-inch pots, 75c per dozen; \$5.50 per hundred; \$50.00 per thousand.**

Nephrolepis Whitmanii Compacta**The Parlor Fern**

This is a condensed form of the "Ostrich Plume Fern," with valuable characteristics added which are not evident in the parent—the pinnae subdividing, making miniature fronds which are superimposed on the main fronds, looking as if two or more were condensed in one. Graceful beyond description. **2¼-inch pots, 75c per dozen; \$5.50 per hundred; \$50.00 per thousand.**

**Newport Fern Scotti.****Nephrolepis Davallioides Furcans****The Fish Tail Fern**

This is a grand Fern, entirely distinct from any of the other varieties of Nephrolepis. Throughout the South and especially at New Orleans, this Fern takes precedence over all others. The ends of the pinnae are so formed as to resemble a fish tail, giving the fronds a crested appearance, very effective. It grows into the most shapely plant of any of the Nephrolepis. Grand for house culture. **Two and one-quarter inch pots, 75c per dozen; \$5.50 per hundred; \$50.00 per thousand.**

**Fish Tail Fern.****Nephrolepis Superbissima****The Fluffy Ruffles Fern**

Its distinguishing characteristics are its dark green foliage, darker than any other Fern, its dense growth being much more compact, and its irregular shaped fronds which give it the name of "Fluffy Ruffles Fern." The fronds are very heavily imbricated, the pinnae overlapping, and are so formed as to resemble miniature Ferns, giving it the appearance of a Fern within a Fern. **Two and one-quarter inch pots, \$1.00 per dozen; \$8.00 per hundred.**

Piersonii, or "Gold Medal Fern."
(See description page 24.)

Nephrolepis Scholzeli**The Crested Fern**

The fronds, like in Scotti, stand erect, and with a graceful arch, forming a plant of ideal shape, and they never break down, giving the plant a ragged appearance, as is so often the case with other plumed forms; furthermore, the loose, elegant arrangement of the fronds, allowing a free circulation of air through the foliage, prevents the center of even the largest specimens from becoming defective or yellow. **Two and one-quarter inch pots, 75c per dozen; \$5.50 per hundred; \$50.00 per thousand.**

Dwarf Ferns for Fern Dishes

These Dwarf Ferns are used by the hundreds of thousands to fill dishes for table decorations. Our sales each year exceed fifty thousand plants. Our stock is in prime condition, ready to use at once. We offer six choice varieties. **50 cents per dozen; \$3.50 per hundred; \$30.00 per thousand.**

Dwarf Ferns for Fern Dishes.

Good & Reese Co.'s Gladioli

G. & R. Gladioli are fast becoming famous, and justly so, as there are no better bulbs grown than we offer. Be sure and try our Gladiolus.

Force Gladioli

Make every inch in your greenhouse count. There is no better way than to plant a Gladiolus corm in each vacant spot in your benches. They will do well between the Carnations. Plant early between the "Mums;" they will be at a nice height when the crop is over. There is always some waste space in every greenhouse that can be made profitable by forcing Gladioli. Varieties that force are marked with an asterisk (*).

Pansy Geranium, MRS. LAYAL, a Wonderful Plant

This new and wonderful Pansy Geranium is of the easiest growth, dwarf in habit, and literally covered with flowers all the time; and as it requires little or no attention, it is invaluable as a window plant. The coloring and markings of the flowers are most extraordinary—light pink, white, dark purple, black, etc., almost rivalling the Pansy in uniqueness of flower. It is this combination of coloring which obtained for it the popular name of Pansy Geranium. Price, \$1.50 per dozen; \$10.00 per hundred.

PELARGONIUMS, or Lady Washington Geraniums

The grandest of all flowering plants; do not resemble the common Geraniums in any particular, neither in foliage nor flower; more beautiful in every way. We here offer eleven distinct sorts, every one entirely different in color and every one a beauty. The Lady Washington Geraniums are the handsomest of all flowers—once seen, never forgotten.

The Easter Greeting or Ever-Blooming Set

\$1.50 per dozen; \$10.00 per hundred.

EASTER GREETING—Planted out as a bedding plant it will bloom continually until late in the fall. It will prove the forerunner of a new race of ever-blooming kinds, as it rivals the Orchids in beauty. This new species is the earliest of all Pelargoniums, with enormous florets and clusters, having light green foliage and of dwarf, robust growth. It blooms from March until fall. Florets fiery amaranth-red, with five large, regular shaped spots. The first and only kind to bloom as well bedded out as in pots, and to do so all summer.

GARDENER'S JOY—The ground color is apple-blossom pink, the two upper petals have blotches of carbon-brown, the florets are three and one-half inches in diameter and are joined to enormous clusters which rise above the beautiful foliage and remind one of a Rhododendron cluster. It is of a half dwarf nature and very sturdy. On account of its rapid, luxuriant growth it is a very profitable market variety.

GLORY—This splendid novelty is quite remountant, florets and cluster very large; ground color, Cattleya-blue, very much like the Cattleya Orchid. The upper petals contain two large purple magenta-red spots, distinctly veined. An exceedingly beautiful and entirely new color in Pelargoniums. This kind has a very robust growth.

KING OF SPAIN—Reddish-purple; fine bold flower of grand form; lighter center, good constitution; very showy.

LUCY BECKER—This grand novelty is a sport of Easter Greeting, and is like it in everything but color, which is a rosy-pink. It is if anything even more free in bloom.

LORD MAYOR TRELOAR—Bright rosy-red with a very effective maroon blotch on the upper petals; edge of petals lighter color, center of flower white.

HARDY PERENNIAL PHLOX

This is one of the most easily grown hardy perennials, and the large number of beautiful varieties now offered make it especially desirable. These noble flowers are not only beautiful as individuals, but the cheerful appearance of our gardens during the summer and autumn months is much indebted to them. They succeed in any position or soil, and can be used to advantage either as single specimens in the mixed border or as large clumps or beds on the lawn. To produce the best results, however, they should have a rich, deep and rather moist soil, and let each clump have a space of from two to three feet in which to develop. They will continue to thrive for several years with little attention, as is attested by the fine clumps about old homesteads. The ease with which they are cultivated, their entire hardiness and the extended time of blooming, combined with the varied and beautiful coloring, make them especially valuable for garden planting. The Perennial Phlox usually commence to bloom in early summer, and are brilliant with color until after several frosts have come. They are admirably adapted for cemetery planting, also for a low hedge or screen to hide old fences and unsightly objects. Do not fail to plant Phlox in the fall, any time from September until the ground is frozen.

Price, one-year field grown plants, 60c. doz.; \$4.00 per 100; \$35.00 per 1,000

"PEONIES FOR PROFIT"

SPECIAL NOTICE—We Issue a Special Wholesale Price List of Peonies—"Peonies for Profit"—that Contains all the Old and New Varieties. Write today for it.

"PEONIES FOR PLEASURE"

Our brochure, "Peonies for Pleasure," gives full information of the history of the Peony, the only plant that has a registered list of named varieties for over fourteen hundred years.

"Peonies for Pleasure" tells how and when to plant, the soil and plants to use; fertilizers, and how to apply. It names the early, medium and late varieties for long succession of bloom. It describes the old and new, the plebeian and the aristocrat, of the Peony family.

The early red, white and pink Peonies of our grandmothers' gardens are almost the only ones generally known. Dear patrons, these are the plebeians of the family; if you wish to know the Peony aristocrat, send for this little treatise.

To all interested in the Peony a copy will be mailed on application.

SIZE OF ROOTS—At the prices quoted in this list we send divisions with from two to five eyes. This is the only size we can supply in the springtime.

TREE PEONIES

This is a remarkable species, developed from Peony Mouton, a native of China and Japan. In habit of growth it is not unlike a deciduous shrub—the growths are short and stocky, the plant eventually attaining a height of four or more feet and of large circumference; the foliage is quite handsome, and the immense flowers, which usually appear some two weeks ahead of the herbaceous class, are most remarkable for their immense size and gorgeous colorings. Splendid for grouping or for specimen plants on lawns. While a hardy plant, it will be found desirable to give it some protection in very cold latitudes. All shoots springing from the base should be rubbed off. We offer any color desired, our choice of varieties only, three-year old plants, at \$1.50 each.

THE CREAM OF THE PEONIES

You may order by the number preceding the varieties or by name, or better still, in ordering use both number and name. For full and complete description of these Peonies send for our booklet, "Peonies for Pleasure." It is mailed free. It also describes and prices over a hundred other choice kinds, both new and old, that are not named in this catalogue. Send for it today.

Novelties in Cannas and Some that are Scarce

EUREKA—Largest white Canna we have seen, often five to six inches across. Need we say the only meritorious white Canna to date; pure white. A good grower and free bloomer. 80 cents per dozen; \$5.00 per hundred.

FIREBIRD—This is by all means the very best red flowered Canna; gigantic trusses of immense flowers with petals two and one-half to three inches and over across. The color is a clear glistening scarlet without streaks or spots of any kind. Don't fail to try it. \$1.00 per dozen; \$7.00 per hundred.

GOLDEN GATE—The flowers open almost pure gold, but soon become richly rayed with orange-crimson and apricot. Throat deep carmine-red; charming variety. \$1.00 per dozen; \$6.00 per hundred.

KATE F. DEEMER—The grand flowers open a rich oriole-yellow, which gradually gives place to a turkey-red in throat of the flower, this in striking contrast with the rest of the blossom, which turns almost white. Thus two colors of flowers will be on the same stalk at one time. This makes a fascinating combination, and is the most unusual of all Cannas. 75 cents per dozen; \$5.00 per hundred.

MRS. ALFRED F. CONRAD—A most remarkable variety, with exquisite salmon-pink flowers of largest size in erect and abundantly furnished heads. So freely produced as to keep up a superb showing of its fine bloom for months above the

rich green foliage; extra fine. \$1.00 per dozen; \$6.00 per hundred.

METEOR—The almost solid mass of deep, dazzling crimson produced is spectacular; a good grower and altogether the very best Canna. \$1.00 per dozen; \$6.00 per hundred.

PANAMA—The color is an attractive rich orange-red, with a well-defined edge of bright golden-yellow. The flowers are very large and the immense spread of the individual blooms coupled with its early free flowering habit makes this Canna noteworthy. \$1.00 per dozen; \$6.00 per 100.

THE WONDERFUL YELLOW KING HUMBERT or QUEEN HELEN—This Canna is a sport from King Humbert, which is known far and wide as "the one best Canna." The yellow flowering form is a better Canna than King Humbert in these particulars. A far better grower and a better bloomer. Yellow Humbert will make at least three or four times the growth of the King and every stalk will have its flowers. The foliage is deep green, same shape as the King. The flowers are deep golden-yellow, spotted red, the individual bloom and the truss being as large as Humbert; without question the best of all Cannas to date. 80 cents per dozen; \$6.00 per hundred.

WINTZER'S COLOSSAL—Colossal indeed are the flowers and bloom heads of this most magnificent Canna. The effect produced by the vivid scarlet flowers is very striking. It is the largest flowered Canna yet introduced, individual florets often measuring over eight inches across. 80 cents per dozen; \$6.00 per hundred.

CRIMSON BEDDER—Dazzling crimson-scarlet, well displayed above the foliage. A conspicuous bedder.

DUKE OF MARLBORO—One of the darkest flowered Cannas grown; rich crimson-maroon.

FLORENCE VAUGHAN—Rich golden-yellow, thickly peppered with bright red spots.

GUSTAVE GUMPER—Rich golden-yellow. Extra fine.

INDIANA—Glistening golden-orange, lightened by flecks of old gold and daintily flecked and pencilled with deep rose. Single blossoms often seven inches across.

JEAN TISSOT—Rich scarlet; very bright.

KING HUMBERT—In this grand Canna we have a combination of the highest type of flower with the finest bronze foliage. It has flowers as large as the orchid-flowering Cannas. Six inches across, in trusses of gigantic size; of a brilliant orange-scarlet with bright red markings. The

foliage is broad and massive, of a rich coppery-bronze; bold and effective. "King Humbert" is the one ideal Canna. 75 cents per dozen; \$5.00 per hundred; \$45.00 per thousand.

LONG BRANCH—Bright crimson, bordered yellow.

MADAME CROZY—Vermilion, gold border.

Flowering Begonias

Price, two and one-quarter-inch pots, except where noted, 85 cents per dozen; \$6.00 per hundred.

Begonias are fine to plant on the north side of the house or other building, or in front of porch where they get shade. The foliage as well as the flowers are extremely ornamental, some being spotted and veined to give a parti-colored effect that is quite striking. Begonias planted with Crotons give a wonderful foliage effect, and this is heightened with their lovely showy flowers.

ALBA PICTA—Long, pointed, slender leaves, thickly spotted with silvery-white. Foliage small and elegant.

ARGENTEA GUTTATA—It has purple-bronze leaves, oblong in shape, with silvery markings, and is in every way a most beautiful Begonia. Produces white flowers in bunches on ends of growth stems. Good for house culture.

CORALLINE LUCERNE, the Grand New Ever-blooming Begonia—This is the grandest of all flowering Begonias. A strong, vigorous grower, with stiff stems and upright habit. The green foliage is long and pointed, freely dotted with silvery-white. The flowers are borne in great clusters from 12 to 18 inches across, almost hiding the plant. The color is a beautiful, bright coral-red of a heavy-waxen texture. This variety is one of the most prolific bloomers of all the large growing Begonias. Its freedom in blooming, the large, rich and showy foliage combined, make it an excellent decorative plant for the house or conservatory, and it should find its place in every collection. \$1.75 per dozen; \$12.00 per hundred.

MARGUERITE—A pretty foliage Begonia with pinkish-white bloom.

GLOIRE DE CHATELAIN—This is the freest flowering Begonia of all. Bright pink flowers. Fine for florists' pot plants. Always in bloom. \$1.25 per dozen; \$8.00 per hundred.

PICTA ROSEA—A wonderfully free-growing Begonia of sterling worth and great beauty. The plant is very compact in growth, forming a dense, well-proportioned bush with rich green foliage, spotted with silver. The flower is a rosy-flesh color, shaded with a silvery-pink and enlivened with dense clusters of yellow anthers. One of the most wonderful flowering Begonias within our knowledge. It blooms continually.

RUBRA—The most widely known and probably the best of all Begonias. This variety is usually very scarce and in great demand. We have a fine stock of it. Dozen, \$1.25; hundred, \$8.00.

SANDERSONII—Bright coral-red flowers. A very pretty variety.

THURSTONI—The under side of the leaves is a rich, purplish-red, the veinings very prominent, while the face, or upper side, is a bronzy-green, shaded with crimson and olive, with a peculiar glossy metallic luster over all. Flowers rosy-white, in large clusters well above the foliage. The plant has a fine habit.

GENERAL COLLECTION OF PLANTS—Concluded

The Wonderful Lemon Ponderosa

A Fine Pot Plant for Florists' Sales.

Nothing that has ever been brought to our notice in the plant line has caused half the commotion that this wonderful Lemon has. It is the true ever-bearing variety. On a plant six feet high no less than eighty-nine of the ponderous Lemons were growing at one time. It was a beautiful sight to see. The tree was blooming, and at the same time had fruit in all stages of development, from the size of a pea up to the ripe fruit, showing it to be a true ever-bearer. Fruit has been taken from this tree weighing over four pounds. The Lemons have very thin rind for such large fruit. It is the juiciest of all Lemons, makes delicious lemonade, and for culinary purposes cannot be excelled. It is not uncommon to make twelve lemon pies from one Lemon. We have the entire stock of this ponderous Lemon, and guarantee the trees to produce the same large fruit. No budding or grafting necessary. Ponderosa Lemon is sure to become popular when it is known. It fruits when quite small, and makes a lovely house plant. OUR GRAND GARDEN DAHLIAS

ARE GREAT FOR
CUT FLOWERS

We Sell Divided Field Roots

Dahlia Countess of Lonsdale.

CACTUS DAHLIAS

So-called from their resemblance to Cactus flowers. They are characterized by long, narrow, pointed, tubular and twisted petals of graded lengths, giving the flowers a striking and attractive appearance. Grand for cut flowers. Price, per dozen, \$1.25; hundred, \$8.00.

AMOS PERRY—The best bright scarlet Cactus to date. Color purest flaming scarlet, with long, narrow, twisted petals of irregular formation. The blooms are borne well above the foliage in the utmost profusion. Certainly a beauty.

AURORA—Very free flowering; reddish-apricot, suffused with flesh-pink, shading lighter at the tips.

CHARLES CLAYTON—The strongest words of praise are not extravagant when applied to this wonderful new Cactus. It is the ideal in color, form, length of stem and general good habits, beyond which it would seem little could be hoped for. The color is a most intense crimson, so vivid as to dazzle the eye; superb.

COUNTESS OF LONSDALE—For perfection of bloom, erectness of stem, abundance of flower, this variety has never yet been equaled. On several of the plants we have counted over 150 perfect blooms on one plant. Is there any other garden flower that can equal it? The color is a rich salmon-pink, tinted apricot.

FLORADORA—Deep dark, rich wine-crimson, splendid shaped flowers on long, upright, wiry stems.

HENRI CAYEAUX—Old gold shading to orange-yellow; a glorious sort.

The Ever-Blooming Butterfly Bush

Buddleya Variabilis Magnifica (Butterfly Bush).

It was a matter of some thought before this highly desirable plant was finally christened with the common English name by which it goes. Several years ago there were imported from Europe some plant novelties and this one was among them. We observed it carefully for a season and were charmed with its beauty, ease of culture and free flowering habit. The name Butterfly Bush was applied to it because it seems to attract butterflies in large numbers. Particularly we notice that it is not alone the common little yellow species of butterfly, but also the large and gorgeously colored butterflies that swarm about it as though vying with it in brilliancy of color. This shrub from a young plant, set out either in the spring or fall, will mature to full size the first summer, producing a handsome bush, which the first year often attains a height of four feet. It produces long,

graceful stems, which terminate in tapering panicles of beautiful lilac-colored flowers that are of miniature size and borne by the hundreds on a flower head which is frequently ten inches long. A single plant the first season will throw out as many as fifty flower spikes, which increase greatly in number during succeeding years. The year after planting, it generally commences to flower in June and continues each season until severe frosts nip it. The foliage and blooms are exceedingly fine. The shrub is rather semi-herbaceous, by which we mean in some latitudes it will die down to the ground and while perfectly hardy, we recommend covering the roots with manure, leaves or other suitable materials as winter approaches, as this will produce a heavy growth the following season. This shrub is very desirable as an individual specimen in the lawn and garden, or placed promiscuously in the shrubbery border. Pot grown. Dozen, \$1.00; hundred, \$6.00.

New Hardy Hydrangea

Arborescens Grandiflora Alba

Or "Hills of Snow"

Here we offer the finest plants to force in pots that have ever been sent out. We forced some the past spring as a trial. We wanted them for Decoration Day. They were all in bloom, every stem having an enormous flower, many of the trusses of flower heads being over a foot across, of the purest paper-white. Our word for it, no plant of any kind will make you the money this plant will. It is simply a wonder. We have a fine stock to offer, suitable for forcing the coming spring. This Hydrangea is absolutely hardy everywhere. For lining out, field-grown plants, eight to ten inches, 60 cents per dozen; \$4.00 per hundred.

HEDGE PLANTS

WE HERE NAME THE MOST SUITABLE PLANTS FOR HEDGES

Berberis—Barberry

THUNBERGII—From Japan. A pretty species of dwarf habit. Small foliage changing to a beautiful coppery-red in autumn. A slower grower than the Privets, but needs no trimming and is a feast for the eye when full grown. \$2.00 per dozen; \$12.00 per hundred.

Ligustrum—Privet

AMURENSE (Amoor River Privet, North)—A very graceful plant, requires little trimming. The leaf is small and rounded, plant branching, has not the stiff, formal effect that the California Privet has. Eighteen to twenty-four inches, branched, \$1.25 per dozen; \$8.00 per hundred.

OVALIFOLIUM (California Privet)—This makes when pruned a very formal hedge, will grow almost anywhere, thriving where other plants refuse to grow. Eighteen to twenty-four inches, branched, \$1.00 per dozen; \$7.00 per hundred.
